EDUCATION

University of Maryland, Baltimore County

(Master of Science in Computer Science, GPA: 3.8/4.0)

Baltimore, MD

Aug 2024 – May 2026

Indian Institute of Information Technology, Sonapat

(Bachelor of Technology in Computer Science and Engineering, GPA: 8.45/10)

Haryana, India

Aug 2019 – May 2023

SKILLS

SaaS and Cloud Platforms: Jira (project and board setup), Confluence, AWS (S3, Lambda, DynamoDB, CloudFront), Django Admin, Stripe, PostgreSQL, Git

Reporting and Documentation: SQL, Excel (Pivot Tables, XLOOKUP), Power BI, Tableau, Lucidchart, Visio, Figma, UML, Python, JavaScript

Process and Coursework: Requirements Analysis, Agile/Scrum, Software Engineering (SDLC), User Onboarding and Support

ACADEMIC EXPERIENCE

Graduate Assistant | UMBC - Software Engineering & Data Structures

Jan 2025 – June 2026

- Configured **Jira** projects and sprint boards for **10 Scrum teams (40 users)**, onboarding each team to the tool and coaching them through sprint planning, reviews, retrospectives, and backlog refinement.
- Served as liaison between teams and their **stakeholders** (UMBC faculty, admin staff from other departments, and local industry partners), triaging evolving requirements and re-prioritizing backlogs against deadlines to deliver all **10 projects on schedule**.
- Taught teams to document requirements as **user stories with acceptance criteria**, SRS documents, and UML design models, then reviewed each team's documentation and sprint demos against stakeholder needs.
- Provided office-hours **support** for **50+** students, troubleshooting technical issues and turning ambiguous requirements into actionable steps.
- Built **200+** automated validation checks for course project submissions, cutting grading time by over **80%**.

INDUSTRY EXPERIENCE

Data AI Engineer | Platinum Business Services (R&D Team) | Catonsville, MD

Dec 2025 – Present

- Translated NIST 800-53 requirements into an automated **compliance gap-analysis report** for a cloud GRC platform, rating each of ~1,200 controls in a System Security Plan as fully, partially, or not satisfied, with citations tracing every verdict to source text, cutting review from **days to <10 minutes**.
- Validated the report's findings by flagging weakly cited results and automatically re-checking them across 5 AI models (OpenAI, Anthropic, Ollama), raising evidence-backed **accuracy from 64% to 92%**.
- Troubleshoot recurring model-load failures on the platform's servers, tracing them to multi-GB model files lingering in memory after download, and fixed them with targeted cache eviction, **eliminating the failures**.

Software Engineer (AI) Intern | PMA | Tallahassee, FL

Sep 2025 – Dec 2025

- Built a **training platform** for a product-management accelerator where trainees submit assignments and an AI reviewer flags gaps against a coaching rubric for coaches to confirm or dismiss, cutting feedback-session prep from **8 to 2 hours**.
- Delivered a coach-facing **cohort report** (trainees × common mistakes, with drill-down) and an admin console for setting up cohorts, assignments, and rubrics without code changes, serving **200+** submissions across 5 cohorts on AWS at **~\$3/month**.

Software Development Engineer | Turfco Landscape Co. | Surrey, BC

Jan 2023 – June 2024

- Gathered requirements from the owners to replace manual quoting with a **self-serve quoting platform**, turning their pricing (base rates, lot-size tiers, slope and frequency adjustments) into admin-configurable rules with per-quote audit trails, so staff reprice each season without a developer and quotes take **<1 min** instead of **~2 days**.
- Launched **online ordering and booking** with Stripe deposits and automated order confirmations, customer notifications, and crew allocation, processing **\$600K+** in bookings across ~1,100 orders.
- Designed the customer journey from property details to instant estimate to paid deposit, with role-based admin access, driving adoption to where **~40%** of bookings arrived outside office hours with no phone support.
