INDUSTRY EXPERIENCE

Data AI Intern

Platinum Business Services LLC

- Contributed to the development of Cyberdome, a platform for automating cybersecurity compliance assessment across frameworks such as NIST 800-53 and FedRAMP

- Engineered vector embedding and retrieval pipelines for control data using Qdrant, enabling RAG systems (OpenAI API and local Ollama models) for context-aware querying and automated validation.

AI Engineer Intern

Product Manager Accelerator

- AI prototype needed production path; built AI tooling and automation for data processing, testing, and deployment workflows, helping ship a scalable feature pipeline and cut review rework 25%.

- Feature handoffs drifted; used AI tooling and automation to test deployments and close 6 defects.

Full Stack Developer Intern

Turfco Landscape Co.

- Built full-stack MERN ecommerce prototype with auth, payments, and cost estimates for user-value demos

PROJECTS

Bloodborne Text Adventure Edition

Interpreting free-form player commands using transformer models

- Modeled a Bloodborne-inspired game world using JSON-based character, location, item, and dialogue schemas

- Leveraged Mistral-7B with few-shot prompting to map natural language player commands to in-game actions.

When Pixels Talk Back

Watermarking impact analysis on computer vision models

- Embedded a 1024-bit blind fragile watermark into RONI regions of lung CT scans, achieving near-lossless quality (SSIM 0.9999) while preserving DenseNet-169 performance (F1 0.952)

Nothing Lost in Translation

Lexically constrained machine translation

- Implemented lexical constraints for EN-RU translation using a custom beam search algorithm, outperforming the default .generate method with higher BLEU scores while ensuring inclusion of missing n-grams
