## EDUCATION

### University of Maryland, Baltimore County

Baltimore, MD

(Master of Science in Computer Science GPA-3.75/4.0)

August 2024 - May 2026

### Indian Institute of Information Technology, Sonapat

Haryana, India

(Bachelor of Technology in Computer Science and Engineering GPA : 8.45/10)

August 2019 - May 2023

## SKILLS / RELEVANT COURSEWORK

**Programming Languages:** TypeScript, JavaScript, Python, SQL, HTML, CSS, Java, C++

**Tools and Frameworks:** React, Next.js, React Native, Django, REST APIs, AWS, Git, Jest, Playwright, Docker, Node.js, PostgreSQL, Tailwind CSS, JIRA

**Area of interest and Coursework:** Software Engineering, Scalable Web Apps, E-commerce, Mobile Performance, Security Best Practices, Integration Testing, Data Structures & Algorithms, OOP, Agile/Scrum

**Workshops and Certifications:** Amazon Campus Prep Series-2025

## INDUSTRY EXPERIENCE

### Data AI Intern

Dec 2025 – Present

*Platinum Business Services LLC*

*Catonsville, MD*

- Contributed to the development of Cyberdome, a platform for automating cybersecurity compliance assessment across frameworks such as NIST 800-53 and FedRAMP

- Engineered vector embedding and retrieval pipelines for control data using Qdrant, enabling RAG systems (OpenAI API and local Ollama models) for context-aware querying and automated validation.

### AI Engineer Intern

Sept 2025 – Nov 2025

*Product Manager Accelerator*

*Tallahassee, FL*

- AI research handoffs lagged; built and deployed a Next.js/React dashboard with Python REST APIs on AWS, cutting PM prep 30% and shipping reusable docs.

- Manual QA lagged; wrote TypeScript integration tests for React flows, catching 12 regressions.

### Full Stack Developer Intern

January 2023 – June 2023

*Turfco Landscape Co.*

*Surrey, BC*

- Built a React/Node e-commerce prototype with secure auth, payments, mobile-responsive UI, and cost estimation

## ACADEMIC EXPERIENCE

### Graduate Assistant

Aug 2025 – Present

*UMBC - Software Engineering & Computer Architecture(400 Level Courses)*

*Baltimore, MD*

- Supported Agile/Scrum teams through code review, testing guidance, and stakeholder coordination to align software deliverables with evolving requirements

- Graded architecture work on pipelining, caches, memory hierarchy, and scalable system tradeoffs.

### Teaching Assistant

January 2025 – June 2025

*UMBC - Data Structures (300 Level Course)*

*Baltimore, MD*

- Held office hours for Java/OOP data structures projects, debugging issues and supporting homework design

## PROJECTS

### Bloodborne Text Adventure Edition

Sep 2025 - Dec 2025

*Interpreting free-form player commands using transformer models*

- Modeled a Bloodborne-inspired game world using JSON-based character, location, item, and dialogue schemas

- Leveraged Mistral-7B with few-shot prompting to map natural language player commands to in-game actions.

### When Pixels Talk Back

Jan 2025 – May 2025

*Watermarking impact analysis on computer vision models*

- Embedded a 1024-bit blind fragile watermark into RONI regions of lung CT scans, achieving near-lossless quality (SSIM 0.9999) while preserving DenseNet-169 performance (F1 0.952)

### Nothing Lost in Translation

Sep 2024 – Dec 2024

*Lexically constrained machine translation*

- Implemented lexical constraints for EN-RU translation using a custom beam search algorithm, outperforming the default .generate method with higher BLEU scores while ensuring inclusion of missing n-grams
