EDUCATION

University of Maryland, Baltimore County

(Master of Science in Computer Science, GPA: 3.8/4.0)

Baltimore, MD

Aug 2024 – May 2026

Indian Institute of Information Technology, Sonapat

(Bachelor of Technology in Computer Science and Engineering, GPA: 8.45/10)

Haryana, India

Aug 2019 – May 2023

SKILLS

Product and Delivery: User Stories & Acceptance Criteria, Requirements Discovery, Backlog Prioritization, Agile/Scrum, Human-in-the-Loop AI Design

Tools: Jira, Confluence, Figma, Lucidchart, Excel (Pivot Tables, XLOOKUP), SQL, Tableau, Power BI

Technical: Python, JavaScript, React, Django, AWS, PostgreSQL, LLMs & RAG

EXPERIENCE

Data AI Engineer | Platinum Business Services (R&D Team) | Catonsville, MD

Dec 2025 – Present

- Turned NIST 800-53 assessment procedures into an **AI compliance gap-analysis feature** for a GRC platform, rating each of ~1,200 controls in a System Security Plan as fully, partially, or not satisfied, cutting a control-by-control review from **days to <10 minutes**.
- Required every AI verdict to cite its source text so assessors could verify it rather than trust it, then raised **evidence-backed accuracy from 64% to 92%** by automatically re-checking weakly cited results across 5 AI models.

Software Engineer (AI) Intern | PMA | Tallahassee, FL

Sep 2025 – Dec 2025

- Identified coaches, not trainees, as the real customer of a product-management accelerator's **AI assignment-review tool**, and built it around a cohort-level mistake report so coaches plan sessions from one screen instead of reading every draft, cutting prep from **8 to 2 hours**.
- Kept coaches in control by having the AI only **propose flags they confirm or dismiss**, protecting trust with paying trainees and using dismissal rates to tune the reviewer between cohorts, and scoped the stack to **~\$3/month** idle cost across **200+** submissions and 5 cohorts.

Software Development Engineer | Turfco Landscape Co. | Surrey, BC

Jan 2023 – June 2024

- Worked with the owners to pinpoint manual quoting as the sales bottleneck and launched a **self-serve quoting product** whose pricing rules staff edit themselves, cutting quote turnaround from **~2 days to <1 min** and making seasonal repricing an admin edit instead of a developer task.
- Launched **online booking** that took a customer from property details to instant estimate to paid Stripe deposit in one flow, driving **\$600K+** across ~1,100 orders, with **~40%** booked outside office hours without phone support.

Graduate Assistant | UMBC - Software Engineering & Data Structures

Jan 2025 – June 2026

- Managed priorities between **10 student teams** (40 students) and their **stakeholders** (UMBC faculty, admin staff from other departments, and local industry partners), re-prioritizing backlogs as requirements evolved to deliver all **10 projects on schedule**.
- Taught teams to turn stakeholder needs into **user stories with acceptance criteria**, SRS documents, and UML designs, then reviewed each team's sprint demos against those needs.
- Coached teams through sprint planning, reviews, retrospectives, and backlog refinement, setting up each team's **Jira** board.
