EDUCATION

University of Maryland, Baltimore County

(Master of Science in Computer Science, GPA: 3.8/4.0)

Baltimore, MD

Aug 2024 – May 2026

Indian Institute of Information Technology, Sonapat

(Bachelor of Technology in Computer Science and Engineering, GPA: 8.45/10)

Haryana, India

Aug 2019 – May 2023

SKILLS / RELEVANT COURSEWORK

Programming Languages: Python, JavaScript, C++, SQL

Tools and Frameworks: Jira, Confluence, Tableau, Power BI, Excel (Pivot Tables, XLOOKUP), Lucidchart, Visio, Figma, PostgreSQL, React, Django, AWS, Docker, Git, LangChain, Claude Code

Areas of Interest and Coursework: Agile/Scrum, Software Engineering (SDLC), AI & LLMs

ACADEMIC EXPERIENCE

Graduate Assistant | UMBC - Software Engineering & Data Structures

Jan 2025 – June 2026

- Coached **10 student Scrum teams** (40 students) in Agile delivery, setting up their **Jira** backlogs and sprint boards and guiding them through sprint planning, sprint reviews, retrospectives, and backlog refinement.
- Coordinated between teams and their **stakeholders** (UMBC faculty, admin staff from other departments, and local industry partners), clarifying evolving requirements and re-prioritizing backlogs to keep all **10 projects on schedule**.
- Taught teams to capture requirements as **user stories with acceptance criteria** and SRS documents and to model their designs in UML, then reviewed each team's SRS, design docs, and sprint demos against stakeholder needs.
- Held office hours to clarify technical concepts and translate ambiguous requirements into actionable steps.
- Developed **200+** unit tests for Data Structures projects (linked lists, self-balancing trees, heaps, hash tables), automating logic checks and cutting grading time by over **80%** across **50+** students' submissions.

INDUSTRY EXPERIENCE

Data AI Engineer | Platinum Business Services (R&D Team) | Catonsville, MD

Dec 2025 – Present

- Translated NIST 800-53 requirements into an automated **compliance gap analysis** for an AI-native GRC platform, structuring ~1,200 controls with their assessment objectives so each SSP control is rated fully, partially, or not satisfied with citations tracing every verdict to source text, cutting review from **days to <10 minutes**.
- Built a priority-ordered fallback in the **RAG chat agent** across 5 embedding models (OpenAI, Anthropic, Ollama), re-embedding and re-running low-citation queries against each successive model's vector index to exploit differences in embedding representation and surface SSP evidence missed by higher-priority indexes, raising evidence-backed control assessment **accuracy from 64% to 92%**.

Software Engineer (AI) Intern | PMA | Tallahassee, FL

Sep 2025 – Dec 2025

- Built an AI-powered **PRD review platform** in React and Django that compares each uploaded draft PDF against a reference PRD and emits schema-validated gap flags for a human-in-the-loop reviewer to confirm or dismiss, giving a cohort-wide matrix that replaces a read of every draft and cuts feedback-session prep from **8 to 2 hours**.
- Architected a fully **serverless review pipeline** on AWS (S3 + CloudFront-hosted React SPA, Django on Lambda, DynamoDB, and an SQS-triggered Lambda AI worker) that retries failed analyses off a dead-letter queue and logs per-report model API spend, sustaining **200+** submissions across 5 cohorts at **~\$3/month** idle cost.

Software Development Engineer | Turfco Landscape Co. | Surrey, BC

Jan 2023 – June 2024

- Worked with the owners to turn a manual quoting process into a **self-serve quoting platform**, encoding their pricing (base rates, lot-size tiers, slope and frequency adjustments) as admin-editable rules with per-quote audit trails, letting staff reprice each season without a developer and cutting quote turnaround from **~2 days to <1 min**.
- Built the **online ordering and booking platform** by taking self-serve orders through Stripe Checkout deposits, confirming them with signature-verified idempotent webhooks, and relaying a transactional outbox to Kafka workers for order confirmation, customer notification, and crew allocation, taking **\$600K+** in online bookings across ~1,100 orders.
- Delivered the **React SPA** that carried a customer from property details to instant estimate to paid deposit in one client-routed flow, with role-gated admin routes and JWT access tokens backed by httpOnly refresh cookies, enabling a streamlined booking flow with **~40%** of bookings occurring outside office hours without phone support.
